Familiar	NodeJS, ExpressJS, MongoDB, JWT, Formik, Redux
Softwares	Chrome Dev Tools, VSCode, Postman, Heroku, Netlify, Slack, Jira, CodeBlocks
Other Skills	Object-Oriented Programming (OOP), Problem Solving, Google Search, Fluent in English

Work Experience

March, 2022 – Present

Software Engineer(Front-End) at KloverCloud,Dhaka
KloverCloud is a DevOps platform which provides cloud solutions. I have contributed in three projects so far and all of them ware built with Angular.
- First one was an open source CI-CD project where an admin can create a company and add users along with repositories and applications and it would remove the headache of maintaining CI-CD.
- Second one is a documentation website. And currently i'm working on a project that shows info and logs of Multicluster in many different ways.

September, 2021 – February, 2022

Full Stack Developer(remote) at Algosolver LLC, USA
Worked on two major client projects using next.js. One of those two was named 'Doortapped', where a client can make a bid for a house and owner can negotiate. After that owner can choose between many offers.

Projects

July, 2021 – September, 2021

Knowledge Gate Quiz: Knowledge Gate is a Quiz application where a participant can choose between different Categories and Difficulties level. Based on the participant's preference the questions will be fetched dynamically from an API called "Trivia API". After answering 10 questions participant will get his/her score with a motivational gif based on the score.
Technology:React, Material-UI, FlexBox, React Router, Trivia API
Website ↗ || GitHub link ↗
